

PUBLIC TRANSPARENCY REPORT

2023

GW&K Investment Management, LLC

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

As a U.S. registered investment adviser and fiduciary to its clients, GW&K is committed to helping our clients preserve and grow their financial assets. As a signatory to the Principles for Responsible Investment, we believe that incorporating environmental, social, and corporate governance (ESG) considerations as factors in our investment analysis process helps us better achieve this objective and is in line with our long-standing commitment to fulfill our fiduciary responsibilities to our clients. It is GW&K's policy to put our clients' interests first and foremost while making investment decisions. By incorporating ESG factors into our investment selection process, we seek to improve the performance of our investment strategies and achieve the best possible risk-adjusted return for our clients. We recognize that the relative impact of ESG factors on performance may vary across industries and regions, but we believe that responsible corporate behavior with respect to ESG factors can lead to positive and sustainable long-term financial performance.

As an active manager, our investment teams use both qualitative and quantitative analysis in the investment process. While we use tools that provide us with data points regarding a company's standing in relation to various ESG factors, it is not the whole of the criteria considered in determining whether an investment is suitable and is appropriately situated from an ESG perspective. Qualitative analysis plays an important role in evaluating how ESG risks are considered.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

As a fiduciary to its clients and a signatory of PRI since 2011, GW&K has proudly worked to enhance and refine its reporting, transparency and incorporation of ESG into our firm and the investment process. Our Firm strives to act responsibly today in order to provide a sustainable tomorrow. Our firm acts as stewards for our client's capital and this includes the incorporation of ESG. Our Firm understands the importance that ESG considerations can have on the performance of an issuer and by incorporating these factors into our research process we enhance our understanding of the complex issues, risks and value drivers that may impact our clients' portfolios over time. During 2022, GW&K established an ESG Task Force to review our firm and Strategy-level initiatives related to ESG. The ESG Task Force is an active working group focused on all aspects of ESG and has initially focused on several priorities including carbon footprint analysis at the firm level, company engagements, client reporting, and proxy voting. We have also completed our first review and analysis of our corporate carbon footprint in order to better assess our Firm's emissions. Finally, we continue to expand upon our existing knowledge of the ESG environment, continue to engage with our investor partners, and stay abreast of industry best practices.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Our commitment to developing thoughtful ESG practices remains at the forefront of our investment approach, and we take environmental, social, governance, and other responsible investing principles seriously within the management of the firm's business and operations, as well as in managing client accounts. We will continue to evaluate the availability of relevant ESG data that may help us further assess the risks and opportunities for the issuers in which we invest.
